

THE LATEST IN TREE SCOUTING CAMERAS

SAFETY AND COMFORT UP HIGH, NEW INNOVATIONS ON THE GROUND, AND EVER-ADVANCING TECHNOLOGY IN TRAIL CAMERA SURVEILLANCE MAY JUST TIP THE ODDS IN YOUR FAVOR THE NEXT TIME YOU HEAD OUT. TAKE A LOOK!

TREE STANDS, PODS AND LADDERS

SUMMIT TREE STANDS: The new 8-foot Trophy Pod has a swiveling seat that's centered above a 7-inch-wide band of surrounding platform, offering complete 360-degree shooting for bow or gun. Composed of steel and aluminum and weighing 95 pounds, the pod has a 300-pound capacity. Call (256) 353-0634, or visit www.summitstands.com.

RIVER'S EDGE TREE STANDS:

The patent-pending 17-foot Double Shot Dual Direction Extreme is a two-man ladder that allows four different seating configurations for two people for bow or gun hunting. With two independent camo padded backrests, two hunters can sit either away from the tree or facing it, as well as in opposite directions. By simply flipping the backrest, this configuration can be swifly and easily changed while hunting. Call (800) 345-6007 or visit www.spectacularsports.com.

LONE WOLF STANDS:

The new Omega Ladder comes in either a 12-foot or 16-foot model. Both use a 36x24-inch one-piece cast aluminum platform, with a built-in bow holder, and both have an oversized padded seat and backrest. Weighing 60 and 68 pounds, respectively, they have independently adjustable ladder feet for leveling. As an added bonus, remove a couple of bolts and the stand converts to an Elite Hang-On. Call (414) 744-4984 or visit www.lonewolfstands.com.

INNOVATIVE TREE STANDS:

The Mag Leveler lock-on has a 26x35-inch platform, allows for an 18- to 28-inch seat height adjustment, and, because of its 6061-T6 aircraft aluminum construction, weighs only 10.5 pounds. One impressive feature is its six unique leveling devices and positions, allowing it to fit nicely in nearly any tree. Call (630) 816-2311 or visit www.innovative-treestands.com.

INNOVATIVE MAG LEVELER

SWIVELIMB:

This revolutionary tree stand design allows you to hunt from virtually any tree. The stand is designed so that you can shoot in any direction without standing up. It weighs just 20 pounds and holds up to 300 pounds! Call (405) 598-5462 or visit www.swivelimb.com.

STANDS, LADDERS, AND GROUND BLINDS

BY STEVE BARTYLLA

BIG GAME TREE STANDS:

New for '07 is the 20-foot two-man Sky-Rise Ladder. This 125-pound stand has a 40x14-inch platform and two padded seats and backrests, and it offers a removable, padded shooting rail. Call (800) 268-5077 or visit www.biggametrestands.com.

TREE LOUNGE: In addition to the improved original Tree Lounge Bowhunter's and Gunhunter's Specials, new for '07 is the Ladder Lounge, a ladder stand that uses the same popular Tree Lounge seat for comfort and safety. Also, Tree Lounge recently purchased the Brent Hunts Elusive Whitetail Tree Stands line and will be marketing these stands in 2007. Call (800) 233-0459 or visit www.treelounge.com.

API: The Generation II ladder stand is a fold-up model that has many of the same features used in API's lock-ons. It has a T screw and strap system to secure the platform, with a stabilizing bar for added support. Call (417) 873-5000 or visit www.basspro.com.

API GENERATION II

AMERISTEP: The new Speed Climber uses a Speed Slide system on the seat and platform cables. This allows the cables to be adjusted for tree size changes on the fly, simply by sliding them and locking them in place. Constructed of steel, the Speed Climber weighs 23 pounds and has dimensions of 33x19 inches. Call (810) 686-4035 or visit www.ameristep.com.

OL' MAN TREE STANDS: Ol' Man now offers its Big Buddy Deluxe ladder stand in 20-foot and 16-foot models. For comfort, it's equipped with 4-inch-thick Comfortech seat cushions and 2-inch-thick backrests, as well as footrests. The platforms are 45x36 inches and offer removable gun rests. Call (888) 656-2606 or visit www.olmanoutdoors.com.

LOGGY BAYOU: Loggy Bayou has redesigned its Bowhunting Ladder to offer an 18-foot and a 21-foot model. With 20x12-inch flip-up seats, these ladders offer 24x18-inch platforms and use the Easy-Snap locking system to secure each section together. The Big Daddy Ladder, also offered in 18- and 21-foot models, has a larger 24.5x17.5-inch seat with a built-in backrest. Call (870) 881-9778 or visit www.loggybayou.net.

COUGAR CLAW: A redesigned cable, along with two pins, allows the Cougar Claw Den II climber to be leveled for both comfort and increased safety. Call (251) 943-1901 or visit www.cougarclawusa.com.

HUNTING SOLUTIONS:

Makers of the Millennium Series tree stands, this company strives to offer an easily hung and comfortable all-aluminum lock-on. The one-piece backrest and sling-style seat is made of Textiline, a material that is resistant to the effects of UV rays, moisture and odors. Call (601) 932-5832 or visit www.huntingsolutionsusa.com.

GORILLA TREE STANDS:

New to the Gorilla line this year is the innovative Field Edge Pod. A rust-resistant powder-coat finish and Timber Scape2 camo cover the all-steel frame of this 101-pound pod. Its cushioned high-back 360-degree swiveling chair sits in the middle of a 39x39-inch platform. Call (810) 733-6360 or visit www.goillatrestands.com.

T-BUCK: With an innovative design, T-Buck offers a new concept in ladder stands. The platform of the stand slides along the ladder and is set in place after the ladder is secured to the tree. Once in place, the 39x31-inch platform has a 20x24-inch door to allow access to the stand. Call (888) 556-1410 or visit www.t-buck.com.

PREDATOR TRAIL CAMS:

The Predator Evolution relies on USB memory storage to hold the images and offers a four-sectioned split screen to view four images at once. Both images and video are easily transferred to a computer. Relying on an infrared flash and a super low-light color image sensor, the quick 1/2-second speed of the trigger captures high-resolution images even at night. Call (608) 628-0001 or visit www.predatortrailcams.com.

RECONYX:

Two new models are available in the Silent Image line. The PM35M13 is a monochrome unit that can capture two frames per second. The PM35C31 takes color shots by day and monochrome-enhanced photos by night. It captures one frame per second. Both offer infrared for night shots and an instant wakeup time of 1/10 of a second for quick response. Call (866) 493-6064 or visit www.silent-image.com.

SMART SCOUTER:

This is one of three cellular game cameras that use cell phone technology to transmit images to a file server. With a subscription, the user manages and downloads images from the server via an Internet connection. Coverage is available in

most places, but where it isn't the camera functions as a typical digital game camera. Call (888) 707-2688 or visit www.smartscouter.com.

STEALTHCAM:

The brand-new I2IR is a 2.0-megapixel black and white camera that relies on 27 infrared emitters to eliminate standard flash. The adjustable PIR sensors are heat and motion triggered, and the camera can be set in a one- to three-image burst mode or capture up to 10 seconds of video footage. Call (888) 304-6125 or visit www.stealthcam.net.

WILDLIFE EYE:

Featuring the revolutionary motion and clock time feature, the Wildlife Eye two-in-one video scouting system allows you to monitor trail activity by motion, or the clock timer feature can be set to monitor an entire field or food plot for a period of seven days a week! The Wildlife Eye's powerful built-in invisible infrared light illuminates up to 40 feet and is not visible to deer. Call (877) 956-5746 or visit www.kolpinoutdoors.com.

TRAIL-POD:

Although not a camera, with its universal camera mounting plate, the Trail-Pod provides the ultimate in flexibility for trail camera placement. The Tree Mount model comes in either a strap-on or a screw-in version. Trail-Pod's Tri-Pod is a stand-alone unit that can be set anywhere and stands up to 4 feet tall. All three units come with an adjustable heavy-duty ball head for precise camera orientation. Call (866) 634-3196 or go online to www.trail-pod.com.

**SMART
SCOUTER**
CELLULAR SURVEILLANCE SYSTEM
